It is Dr. Neupauer's report that I finally tracked down. It is included in a document by the Natural Resources Defense Council. The NRDC document also contains another report she did about the degradation of groundwater from ISR mining that is helpful.

Subject: Modeling report

Hi Lucita,

In your response to comment 72, you mention that EPA reviewed the 2010 report entitled Groundwater Flow and Transport Modeling of Uranium ISL Mining.

Do happen to have a copy of this report, or could you let me know where to find it?

Thanks.
